

Christchurch Engine Centre

ENVIRONMENTAL POLICY STATEMENT

The Christchurch Engine Centre is committed to conserving our New Zealand and global environment, and to contributing to ecological sustainability through efficient resource usage.

We will continually improve our environmental strategies and practices to minimise the environmental impact of our operations on our surroundings by:

- holding operating managers accountable for environmental performance and for providing leadership and required resources
- the responsible management of environmental aspects of our operation, processes, products and services
- complying with applicable statutory obligations, company policies and environmental protection standards and going beyond these as necessary to achieve our goals
- reducing pollutants associated with our processes to the lowest practicable & achievable levels, conserving natural resources in the design, manufacture, use and disposal of products and delivery of services
- minimising any adverse environmental effect of new developments for products, processes and services or changes to existing operations, processes, services and products
- integrating environmental considerations into our planning and decision making/ investment decisions
- quantifying environmental objectives and targets, measuring our performance and regularly reporting our progress to our employees, stakeholders, the community and interested parties.
- working with our contractors and suppliers to ensure environmental considerations are included in our dealings
- responding to any environmental concerns raised by our employees, stakeholders, community or interested parties in respect of our operation

It is the personal responsibility of every employee of the Christchurch Engine Centre to support this Policy and it's objectives by:

- complying with environmental requirements and practices when performing their duties
- supporting initiatives to improve our environmental performance at work
- reducing waste and conserving resources wherever possible
- participating in training to increase their environmental awareness and understanding of those issues relating to their allocated responsibilities and surroundings
- being aware of the importance of reporting any incident or circumstances which may be or become an environmental risk or hazard or which may compromise our environmental policy
